### NATURAL DIAMOND GRADING REPORTS

GIA Diamond Grading Reports include testing to determine whether material is a diamond, and whether it is natural or laboratory-grown. 4C's quality assessment includes diamond color grade, clarity grade, carat weight and only for standard round brilliant - cut grade. All diamonds are tested for laser drilling, fracture filling and color treatments. Diamonds found to have undergone a color treatment will have the girdle inscribed with "TREATED COLOR" and be charged the appropriate fee. See inscription fees on page 2. Grading and laser inscription services are performed on loose diamonds only. Custom laser inscription available at an additional charge.
