LABORATORY-GROWN DIAMOND SERVICES

GIA laboratory-grown diamond services include an overall quality assessment for laboratory-grown diamonds. The GIA assessments for laboratory-grown diamonds have a distinct format to fully differentiate them from reports for natural diamonds. The laboratory-grown diamond's girdle is laser inscribed with "Laboratory-Grown" and the GIA quality assessment number.

LABORATORY-GROWN QUALITY ASSESSMENT

GIA's Laboratory-Grown Diamond Quality Assessment provides an overall quality evaluation of loose, laboratory-grown diamonds. Each diamond is classified as either **Premium** or **Standard**, based on its criteria. This service applies to colorless to near-colorless laboratory-grown diamonds weighing 0.15 carats or more. Each diamond's girdle is laser inscribed with the term "Laboratory-Grown" and the GIA quality assessment number.

- Pricing is determined by multiplying the total carat weight by the cost per carat. A minimum fee applies to each stone submission, as outlined below.
- Stones must be submitted in clean, unmarked parcel paper. Failure to comply will result in an additional fee.

Item	Fee
Cost Per Carat	¥2,640
Minimum Fee, per stone submission	2,640
Rejection Fee	880
Unmarked Parcel Paper Fee, per stone	528
